# Waleed **Ahmed**

🌐 wahmed.dev    ✉ waleed@wahmed.dev    📞 647-708-7272    in waleed-a    ⌂ w29ahmed

## Skills

| | |
|---|---|
| **Languages:** | C++, C, Python, JavaScript, Java, C#, HTML, CSS, SQL, QML, Assembly |
| **Libraries & Frameworks:** | ROS, OpenCV, Qt, Node, React, Express, Flask, Google Test, Thrift, Hadoop, Kafka |
| **Tools & Technologies:** | Git, Linux, QNX, Perforce, SVN, MongoDB, Jenkins, Docker, LaTeX, Jira |

## Experience

**Zoox**                                                                          *Foster City, CA*
Software Engineering Intern                                                        *Sep 2021 – Dec 2021*
- Developed software features for an integration testing framework capable of running driving software on representative hardware
- Designed and developed an improved sensor playback system that enabled more efficient and accurate playback during integration tests

**Huawei**                                                                        *Toronto, ON*
Autonomous Vehicles Software Engineering Intern                                    *Sep 2020 – Dec 2020*
- Developed a unit test suite for a Frenét frame motion planning stack with **90%** code coverage using **Google Test**
- Designed and implemented a path-building library using **C++** to construct a variety of reference paths to test planning algorithms on
- Used **C++** and **Matplotlib** to extract insights from vehicle trajectory data that helped expose flaws in motion planning algorithms

**Qualcomm**                                                                      *Toronto, ON*
Automotive ADAS Software Engineering Intern                                        *Jan 2020 – Apr 2020*
- Developed system and application software for an ADAS and autonomous driving platform in **C/C++**
- Accelerated performance of a **computer vision SDK** by an average of **20x** by leveraging available hardware and software architecture in automotive focused Snapdragon SoCs

**Christie Digital**                                                              *Kitchener, ON*
Software Engineering Intern                                                        *May 2019 – Aug 2019*
- Worked closely with QA and UI/UX designers for user interface development and maintenance to meet release deadlines across a wide variety of platforms using the **Qt** framework in **C++** and **QML**
- Significantly reduced the effort needed to maintain code health through software architecture redesign and setup of a continuous integration pipeline on a **Jenkins** build server that included unit tests with **90%** code coverage using **Google Test**

**Synaptive Medical**                                                             *Toronto, ON*
Video Software Engineering Intern                                                  *Sep 2018 – Dec 2018*
- Improved visibility of biological tissue during surgical procedures through color manipulation using **C++ (OpenCV)** and **C#**
- Enabled intuitive usage of a color manipulation algorithm through a web interface built with **JavaScript**, **HTML**, and **CSS**
- Post-processed image data in **Python** using **Pandas**, **Numpy**, and **Matplotlib** to analyze color manipulation

## Projects

**Autonomous Robot Racing** ⌂                                                     *UW Robotics*
- Managed development for a robot that competed in the **International Autonomous Robot Racing Competition**
- Developed software architecture in **ROS** and **C++** for perception, mapping, and path planning using a stereo camera, IMU, and LiDAR

**Synviz** ⌂                                                                      *UofTHacks VII (3rd place)*
- Built an IoT device using a **Raspberry Pi** that could decode spoken text from facial input
- Developed a backend web server in **Python** using **Flask**, **Google Cloud Storage**, **OpenCV**, and **TensorFlow**

**Agilite** ⌂                                                                     *DeltaHacks V*
- Built an image processing pipeline in **Python** using **OpenCV** and **TensorFlow** capable of recognizing handwritten text from an agile board

**Bicyle Sensor** ⌂                                                               *ECE 298 Course Project*
- Designed hardware and software for an ultrasonic object detection module aimed at cyclists on the **MSP430** low power MCU platform

## Education

**University of Waterloo**
B.ASc Computer Engineering                                                        *Sep 2017 – Apr 2022*
- Relevant Coursework: Distributed Computing, Robot Dynamics & Control, Cooperative & Adaptive Algorithms, Computer Networks, Database Systems, Operating Systems, Compilers, Systems Programming & Concurrency, Algorithms & Data Structures
- Online Coursework: Web Development Bootcamp, Self-Driving Cars Specialization, Machine Learning, Computer Vision
